## WORK EXPERIENCE

### ● Sr Full Stack – Cogent IBS

Mexico City

Jan 2019 - PRESENT

**TECHNOLOGIES:** React JS, UI/UX, NodeJS, AWS, Lambda, API Gateway, SAP Fiori, PHP, Sails, Pouch DB, SAP UI5, Cognito.

#### Description

Skandia Project: I have been working in an SAP custom system, the big challenge was to use SAP just as a backend, the front end has been built with ReactJS, Sails, NodeJS so I proposed a JavaScript Stack on middleware and front end.

Smart Hire Project: I worked a system to manage interviews, it was coding with ReactJS, ANT D, DVA on the back end I connected to AWS with API Gateway, Dynamo DB, Lambda, Cognito, S3, Cloud Front.

### ● Sr Full Stack – Accenture

Mexico City

Sep 2017 – Jan 2019

**TECHNOLOGIES:** Vue Js, Nodejs, SAP Fiori, Personas, Agentry, Agile, AWS, Hana, UI5, SAP Personas, React JS, Cordova.

#### Description

Passport Project: I managed a team to create an SAP Fiori Custom App. I used SAP Cloud Tools to coding and setting up. I implemented design thinking to develop prototypes and Scrum Agile methodology for development.

Agentry Project: I created a hybrid app for IOS and Android. I developed with React JS and SAP Integration Gateway to expose RFC. The propose was to show inventory in the warehouse.

Personas Project: I worked on SAP Screen Personas as a legacy system, but I migrated to Vue JS application, with Node JS connected to Pouch DB. I added functionality to load the spreadsheet on a DataBase.

KPI's project: I created a KPI system base on data that user capture before. I worked with React JS and Engaged JS.

### ● Sr Full Stack– Grupo ASSA

Mexico City

Jun 2015 – Sep 2017

**TECHNOLOGIES:** UI5, SAP GW/IGW, SQL, Cordova, SAP Fiori. OData

#### Description

Origination Project: I worked on creating an android app, that uses UI5 and SAP Fiori, it had offline functionality that means I emulated back end system in the mobile device they have to synchronize data on demand.

Grupo Mexico Project: I worked as a webmaster on that company, I developed dashboards, KPI's, and landing pages on demand with jQuery, Vue JS, and ReactJS.
